About Me

I am an NSF Graduate Research Fellow and 3rd year Ph.D. candidate at the University of Colorado Anschutz Medical Campus | Department of Bioengineering. My research interests is in applying novel computational tools from complexity science and non-linear dynamics and data assimilation to advance medical physiology. My physiological specialties are cerebral vascular blood flow for traumatic brain injury and stroke patients and islet pathophysiology in diabetes.

Education

University of Colorado Anschutz

Aurora, Co

Bioengineering Ph.D. Candidate

2020-Present

- Advised by Dr. David Albers (Ph.D Mathematical Physics) and Dr. Richard Benninger (Ph.D. Physics)
- **GPA:** 4.0
- **Topics:** Data Assimilation, Machine Learning, Biomedical Informatics, Timeseries Analysis, Mathematical Modeling of Physiology, Network Theory
- **Relevant Classes:** Network Analysis and Modeling - Dr. Aaron Clauset; Data Science and Analysis of Time-Dependent Biomedical Data - Dr. David Albers; Complex Systems Methods - Dr. Allison Goodwell; Numerical and Analytical Methods of Engineering - Dr(s). Vitaly Kheyfets and Melike Sirlanci; Random Processes for Engineers - Dr. Alireza Vahid

Sante Fe Institute

Sante Fe, NM

Complexity Systems Summer School

2022

- Month long intensive education on state of the art Complexity Science
- **Projects:** Transmission dynamics under spatially clustered immunity, Chaos and Control Reading Group

Pepperdine University

Malibu, CA

Double Major: Bachelor of Science in Physics and Sports Medicine **minor:** Applied mathematics

2016-2020

- **GPA:** 3.9/4.0, *Suma Cum Laude*
- **Notable awards:** Natural Science Student of the Year, Physics Student of the Year, Edison Achievement Scholarship, Faculty and Staff Scholarship, Pepperdine Grant, Rosemarry Raitt Endowed Scholarship, Natural Science Award

Fellowships

2021-2025 **National Science Graduate Research Fellowship**, Physics of Living Systems

2022-2026 **Special Interest Group of High Power Computing Fellow**, Association of Computational Machinery

2020-2025 **Bioengineering Fellowship**, University of Colorado | Anschutz Medical Campus

2020-2025 **Werner and Kitty Hirs Fellowship**, University of Colorado | Anschutz Medical Campus

Research Experience (publications below)

Computational Methods and Complexity Science to Aid in Clinical Decision Making and Advance Biomedicine

University of Colorado Anschutz,

Aurora, Co

Departments of Bioengineering and Biomedical Informatics

2020-Present

- Additional Mentors: Tellen Bennet M.D., Jane Resuch M.D., Melike Sirlanci Ph.D., Soojin Park M.D.
- Research to improve clinical decision support for treatment of stroke and traumatic brain injury coupling a novel physiological informed cerebral hemodynamics model with data assimilation, mechanistic machine learning, and time series analysis.
- Investigating mechanisms underlying cellular communication and blood flow in diabetes using network theory and computational modeling.

Heliospheric Research Intern

Greenbelt, Maryland

NASA Goddard, Code 674

2019

- Through Big data analysis techniques, discovered a never documented phenomenon in the dayside ionosphere and corresponding magnetospheric signatures.
- Manipulated, graphed, and analyzed data using IDL and Python

American Geophysical Union Fall Conference	Fasel, G. J., et al. (2017, December). What Solar Wind Conditions Produce Poleward Moving Auroral Forms?

Teaching

University of Colorado Anschutz	<i>Aurora, Co</i>
Analytical Methods and Machine Learning: Teaching Assistant	2022-2023
• Topics included: measure theory, linear algebra, dynamical systems, differential equations, timeseries analysis, regression, regularization, support vector machines, etc.	
• Wrote and taught weekly recitations, assisted professor in lesson planning, graded homework and exams	
University of Colorado Anschutz	<i>Aurora, Co</i>
Numerical Methods for Bioengineering: Teaching Assistant	2022-2023
University of Colorado Anschutz	<i>Aurora, Co</i>
Bioengineering Lab: Teaching Assistant	2022-2023
University of Colorado Denver Bioengineering Empowerment Program	<i>Aurora, Co</i>
Guest Lecturer	2021-2022
• Provided guest lectures on informatics and the scientific process to underprivileged and underrepresented high school student	

Additional Experience

University of Colorado Anschutz	<i>Aurora, Co</i>
Member of Department of Biomedical Informatics Educational Committee	2022-2023
Clear Direction Mentoring	<i>Aurora, Co</i>
STEM Mentor for underrepresented, underprivileged high schoolers	2021-2022
Self Employed	<i>Malibu, Ca</i>
Physics, Mathematics, and Physiology Tutor	2017-2020
Pepperdine University	<i>Malibu, Ca</i>
Pepperdine Physics Club President	2018-2020
• Organized, planned and executed large events with emphasis on enhancing community and sharing science with public	
• Applied for grants and apprehend funding to hold events	

Mission at Natuvu Creek

Medical and Educational Volunteer

- Diagnosed and treated medical and dental needs for 100 citizens of Vanua Levu, Fiji
- Taught astronomy, math, and physics a class of high school students

Vanua Levu, Fiji

June 2018

Pepperdine University

Spiritual Life Resident Advisor (On-Call)

Malibu, Ca

2017–2018

Emily Shane Foundation in partnership with the boys and girls club

Academic mentor for low income students

Malibu, Ca

2017
